OUR VISION

BUILT ON VALUES. DELIVERED WITH VISION.

At Vision Constructions, we build with purpose, integrity, and genuine care for the people who make our work possible. Since 2009, we have grown into a trusted North Queensland construction company by delivering quality, value, and dependable project outcomes.

Clients choose us because we solve problems, streamline the process, and consistently deliver safe, high-quality projects on time. We're known for our attention to detail and a hassle-free approach that elevates the standard of project delivery.

Our strength lies in our people. We select experienced employees and subcontractors who share our values - honesty, humility, hard work, and a commitment to going home safe each day. Their professionalism forms the foundation of every project we undertake. We invest in their continual growth, support their career development, and create opportunities that empower them to provide a strong future for their families. When our people thrive, our projects and our community thrive with them.

As a locally owned company, we remain agile and accountable, able to make decisions quickly and confidently. This allows us to maintain quality, uphold our values, and ensure our clients receive the best possible outcome.

Our vision is to be known for our people, our integrity, and the quality we deliver in every project.

THE VISION DIFFERENCE

We pride ourselves on being a seamless, end-to-end solution for our clients. Whether supporting planned works or responding to urgent issues, we remove the hassle of coordinating multiple contractors.

Having a multi-discipline team allows us to mobilise quickly, work efficiently across complex sites, and adapt to changing operational requirements. With in-house engineering capability and experienced project managers, we deliver technically sound solutions while maintaining clear oversight across every phase of delivery.

Our sophisticated project documentation and handover systems ensure client requirements are clearly understood and consistently met.

At Vision Constructions, we are committed to delivering safe, high-quality projects while minimising our environmental impact. Our integrated management systems are fully ISO-accredited, ensuring we operate to internationally recognised standards across all areas of our work.

SAFETY

Safety is our first priority. We maintain disciplined processes, proactive planning, and a culture that empowers our people to work safely and look out for one another so every person goes home unharmed.

QUALITY

Quality underpins every phase of delivery. Through robust controls, clear documentation, and skilled personnel, we consistently meet client expectations and deliver reliable, high-standard outcomes.

ENVIRONMENTAL

Environmental responsibility guides our approach to planning and construction. We work to reduce waste, prevent environmental harm, and operate sustainably on every site.

OUR CAPABILITIES

- INFRASTRUCTURE SUPPORT SERVICES
- MARINE & WATER INFRASTRUCTURE
- STRUCTURAL, MECHANICAL & PIPING
- CIVIL CONSTRUCTION
- MINING CONSTRUCTION

BUILT ON VALUES. DELIVERED WITH VISION.

INFRASTRUCTURE SUPPORT SERVICES

CORE CAPABILITIES

Concrete Rectification
Structural repairs of defective and deteriorating concrete structures.

Operational Support & Engineering Services
Civil and structural services tailored to operational sites, including ad-hoc repairs and small project delivery.

Minor Civil Construction Projects
Concrete works, drainage, earthworks, structural repairs, and small-scale infrastructure upgrades.

Asset Inspection & Maintenance
Routine inspections, condition reporting and programmed maintenance for hard to access and high-risk assets.

Specialist Trade Services
In house metal fabrication, pipework and plumbing capabilities for responsive, onsite problem solving.

PAST PERFORMANCE

- **AIMS Facility Maintenance & Minor Works Projects (2022 - Current)**
- **Douglas Water Treatment Plant Maintenance & Expansion Projects (2024 - Current)**
- **Glencore Drainage Rectification Works (2024)**
- **Townsville City Council Plant Maintenance - (2025 - Current)**

MARINE & WATER INFRASTRUCTURE

CORE CAPABILITIES

Concrete Structure Rectification
Structural repairs of defective and deteriorating concrete elements over water, including demolition, reinstatement and replacement of corroded reinforcement sections.

Fixed & Floating Structures
Repairs and replacement of damaged steel and aluminum components on marine assets such as gangways and pontoons.

Structural Pile Repairs
Remediation of deteriorated piles through concrete encasement, jacket systems and protective coatings. Installation of proprietary marine pile protection products.

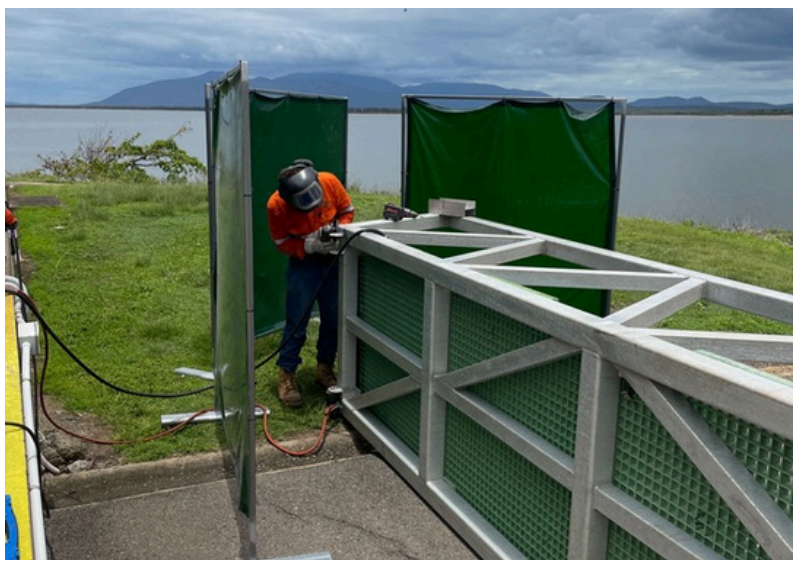

Abrasive Blasting, Surface Coating & Protective Treatments
Surface preparation and coating of steel and concrete marine structures. Application of high performance protective systems.

Fender Repairs & Upgrades
Replacement and installation of marine fender systems including timber, rubber and composite units, to protect structures from vessel impact.

Cathodic Protection Repairs
Maintenance and reinstatement of sacrificial anodes and impressed current cathodic protection systems to mitigate corrosion in marine environments.

PAST PERFORMANCE

- AIMS Facility Maintenance & Minor Works Projects (2022 - Current)
- Paluma Intake Structure Repairs (2025)
- Glencore Port Facility Concrete Repairs (2024)
- AIMS Pontoon Guide Pile Repairs (2023)

STRUCTURAL, MECHANICAL & PIPING

CORE CAPABILITIES

In-house Fabrication

Workshop fabrication of structural steel, mechanical components and piping systems in accordance with AS/NZS 1554 standards. Services include precision cutting, forming, welding, trial fitting and application of protective coatings.

Structural Site Welding

Onsite welding, installation and modification of structural and mechanical components to AS/NZS 1554 and project specific procedures. Supported by fully equipped mobile welding units, rigging & lifting requirements and certified personnel for confined space and working at heights.

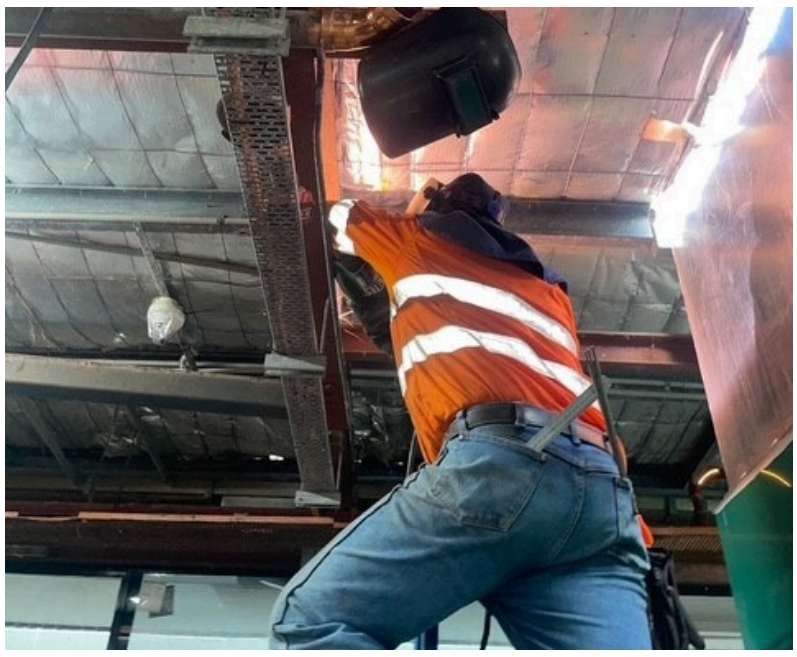

Structural Steel Rectification

Repair and strengthening of damaged or corroded structural steel elements, including section replacement, weld restoration and application of corrosion protection systems, delivered in compliance with relevant Australian standards. Service includes development of repair methodologies for client review prior to works undertaken if requested.

Offered Services

MIG, TIG & Stick welding for all inhouse fabrication, structural site welding and structural steel rectifications. Welding capabilities of flat, horizontal, vertical, overhead and combination. Services offered include wide variety of materials (steel, stainless steel & aluminum).

PAST PERFORMANCE

- **AIMS Facility Maintenance & Minor Works Projects (2022 - Current)**
- **Douglas Water Treatment Plant Maintenance & Expansion Projects (2024 - Current)**
- **Glencore Drainage Rectification Works (2024)**
- **Ayr Filtration Plant (2025 - 2026)**
- **Townsville City Council Plant Maintenance (2025 - Current)**
- **Townsville City Council Condon Sewer Treatment Plant Platform Construction (Current)**

CIVIL CONSTRUCTION

CORE CAPABILITIES

Bulk Earthworks

Cut to fill operations, large embankment construction, structural fill, trench excavation and ground surface treatments.

Road Construction & Repairs

New road construction, pavement rehabilitation, shoulder reinstatement and bituminous sprayed sealing for public and private networks.

Rural Road Grading & Access Tracks

Maintenance grading, re-sheeting and formation of rural access racks on unsealed road networks in remote and regional locations.

Drainage Structures

Installation and repair of culverts, causeways, headwalls and surface water controls

Concrete Structures

Water retaining structures, retaining walls, concrete drainage systems including RCP's RCBC's and SLBC's

Clearing & Grubbing

Vegetation clearing, root removal and site preparation in accordance with environmental and cultural heritage requirements.

PAST PERFORMANCE

- **Tei Dome Shelter Foundations (2026)**
- **AIMS Stormwater Pit Rectifications (2025)**
- **AIMS Road Emergent Works (2022 - 2026)**
- **Douglas Water Treatment Sludge Pond Upgrade (2024)**
- **Ayr Filtration Plant (2025 - 2026)**
- **Townsville City Council Rural Road re-grading (2018)**
- **Australia Pacific LNG Miles QLD Well Heads (2015)**
- **Aurukun to Batavia (2012)**
- **Peninsula Development Road Restoration Works (2009)**

MINING CONSTRUCTION

CORE CAPABILITIES

Mine Site Earthworks & Civil Infrastructure

Site preparation, excavation, trenching and structural fill for equipment pads, laydown areas and associated mine site infrastructure.

Access Roads & Hardstands

Construction, maintenance and rehabilitation of site access roads, service tracks and hardstand areas, including grading, pavement repairs and drainage improvements.

Concrete & Equipment Foundations

Formwork, steel fixing and concrete construction for plant foundations, equipment plinths, slabs, bunds, retaining structures and service protection.

Structural Steel & Access Systems

Fabrication, welding, installation and modification of steel structures, equipment supports, platforms, walkways, stairs, ladders and handrails.

Pipework & Water Infrastructure

Installation, modification and repair of water supply, drainage and service pipework, including pumps, pits, culverts and associated infrastructure.

Fixed Plant & Mechanical Support

Maintenance and repair of fixed plant and associated components, including mechanical fitting, fabrication and equipment installation support.

Infrastructure Upgrades & Maintenance

Civil, structural and mechanical works to support asset repairs, infrastructure upgrades and replacement of deteriorated or damaged site facilities.

PAST PERFORMANCE

- Dynobel Phosphate Hill Civil Foundation Works: Chiller Tie downs (2026)
- Sun Metals Solar Farm (2017 - 2018)
- Jubilee Plunger Gold Mine Bulk Material Extraction (2011)
